

# AUREON

## The Legend of the Jungle Chain

### PROLOGUE: The Whisper of the Canopy.

*Deep within Polygon's emerald expanse lives a young monkey named Aureon — curious, daring, and endlessly optimistic.*

*While others chase hype, Aureon listens to the rustle of the leaves*

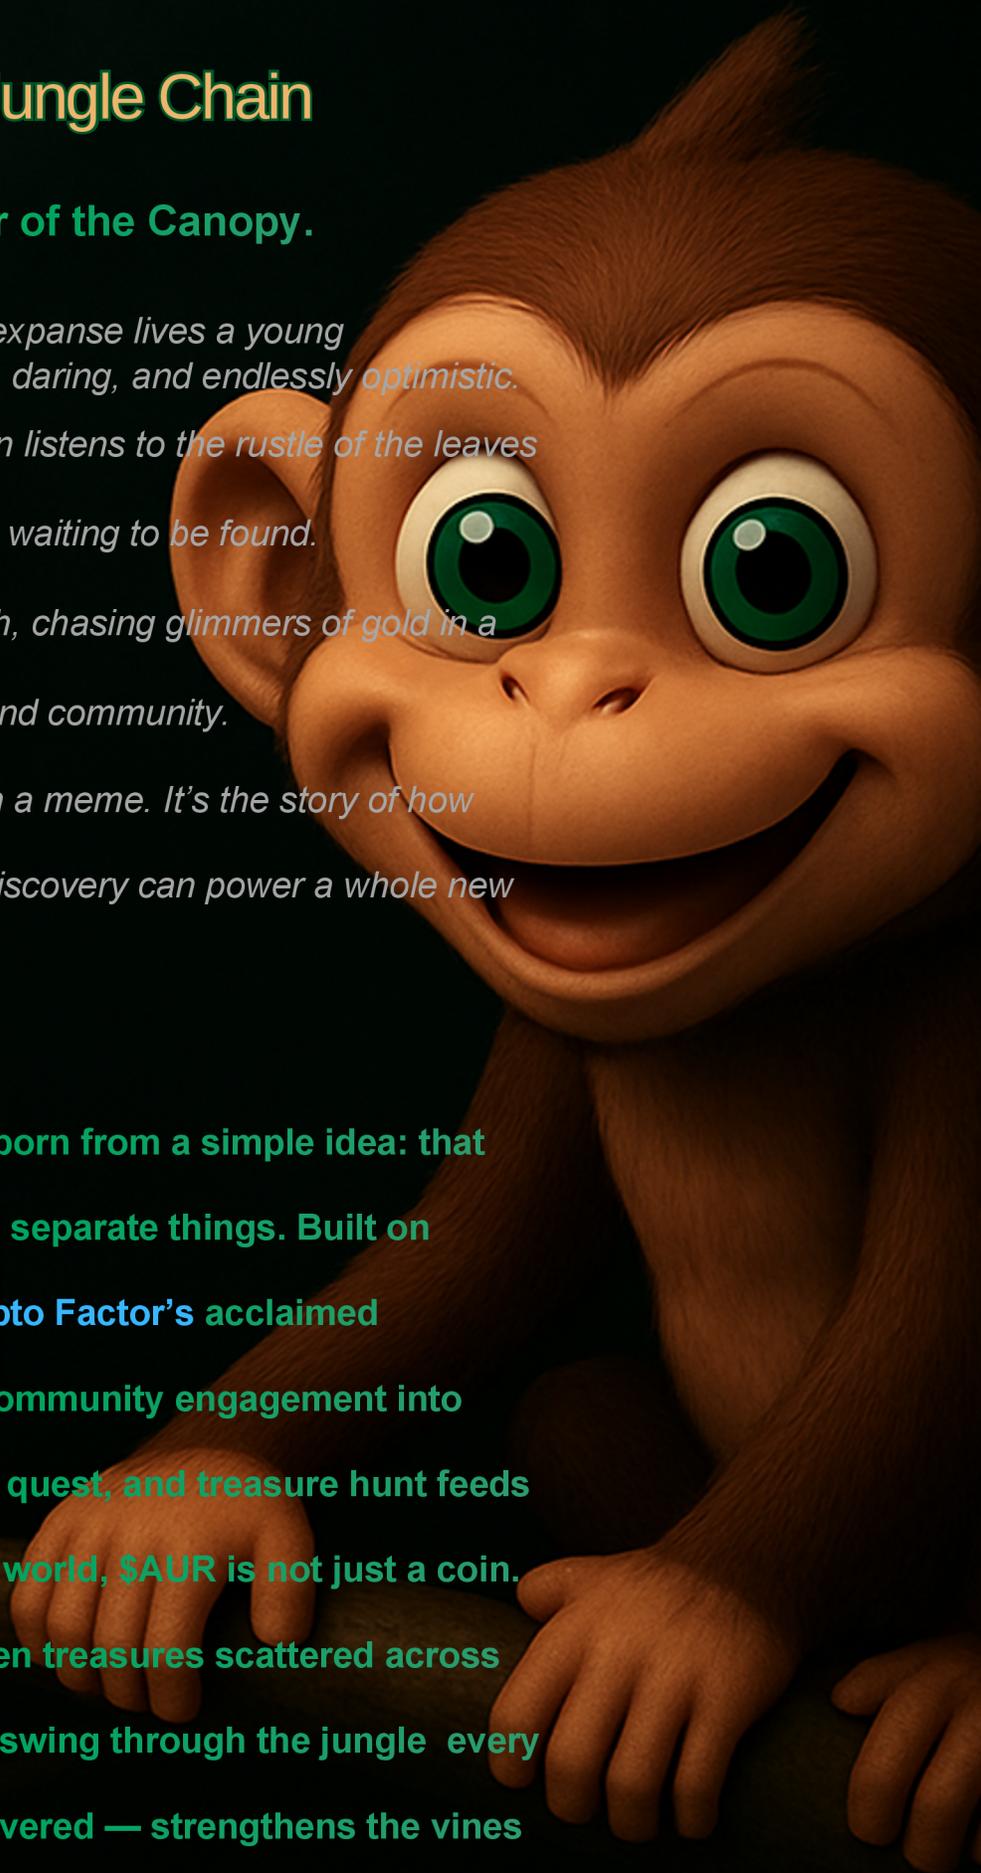

*— the quiet sign of hidden value waiting to be found.*

*He swings from branch to branch, chasing glimmers of gold in a digital jungle woven from code and community.*

*Aureon's adventure is more than a meme. It's the story of how laughter, curiosity, and shared discovery can power a whole new kind of Web3 economy.*

### 1. INTRODUCTION

**The Aureon Ecosystem was born from a simple idea: that fun and value don't have to be separate things. Built on Polygon, and powered by Crypto Factor's acclaimed infrastructure, Aureon turns community engagement into adventure where every meme, quest, and treasure hunt feeds a living economy. In Aureon's world, \$AUR is not just a coin. It's a compass. A map to hidden treasures scattered across the blockchain canopy. Every swing through the jungle every quest completed or NFT discovered — strengthens the vines that connect the Aureon tribe.**

## 2. \$AUR TOKEN

### THE MONKEY TREASURE

\* NAME: Aureon

\* SYMBOL: \$AUR

\* TOTAL SUPPLY: 100,000,000 (fixed)

\* TYPE: Utility / Companion / Incentive Token

\* NETWORK:

Polygon (primary, interchain compatible)

\* READY: Powered by Crypto Factor (Polygon grantees)

#### Aureon's Treasure

The \$AUR token serves three core roles:

1. **Utility** – It fuels treasure hunts, staking, and reward distribution.

2. **Companion** – It's woven into every part of the Aureon ecosystem, from NFTs to governance.

3. **Incentive** – It rewards explorers for their bravery, creativity, and loyalty.

In the **jungle** every movement matters

The more the tribe plays, trades, and explores,  
the richer the canopy grows.\*\*

### 3.TOKENOMICS

## THE MAP OF RICHES

Total Supply: 100,000,000 **\$AUR**

#### Distribution of the Hoard:

40% – Presale (the first banana offered to brave explorers)

20% – Community Rewards (treasure hunts, airdrops, contests)

16% – DEX Liquidity (the trading river of the jungle)

10% – CEX Listings (bridges to new lands)

10% – Team & Development (keepers of the canopy)

4% – Partnerships & Special Drops (alliances in the wild)

#### Presale Journey:

The first vine will be offered in three stages, each one lifting Aureon higher into the sunlight. Early explorer will enjoy the best entry points while latecomers, will help deepen the jungle root through liquidity and-stability.

## 4. MECHANIC THE GOLDEN FRUIT

Every transaction within the jungle feeds back into the system through an 8% Eco-Tax, nourishing the tribe and sustaining the canopy.

### Distribution of the Eco Tax:

- 15% — Staking Rewards: fruit for the loyal
- 15% — Liquidity Mining: nectar for the builders
- 20% — Multi-Asset Backing (MAB): gold in the vaults
- 35% — Team Treasury: vines for growth and innovation
- 15% — Infrastructure: the roots that keep it alive

### Multi-Asset Backing (MAB):

.To protect the jungle's wealth, Aureon's treasure vault holds a blend of assets:

- . 80% POL (Polygon native token)
- . 20% CFR (Crypto Factor Token)

This foundation ensures that even in storms, the jungle stands tall.

## 5. THE UTILITY OF \$AUR THE ADVENTURE ITSELF

Every \$AUR holder becomes an explorer in Aureon's world; their adventure shapes the destiny of the jungle.

### Path of the explorer:

**Treasure hunt:** solve on-chain puzzles, decode clues, and claim hidden rewards.

**NFT relics:** collect limited jungle treasures — unique NFTs found through adventure.

### Staking and rewards:

Plant your \$AUR and watch it grow; earn multipliers and sacred drops.

**Tribal governance:** vote on Aureon's next quests, hunts, and community expansion.

**Access and perks:** unlock private clearings, premium drops, meme contests, and early entries.

Each vine leads to value; each explorer strengthens the tribe.

## 6. DEVELOPMENT AND SECURITY THE KEEPER OF THE CANOPY

Behind Aureon's playful spirits lies serious architecture. The jungle is secured through Crypto Factor's proven, modular, and interchain-ready infrastructure.

### Security practices:

Non-custodial contract and transparent treasure routes

Multi-sig and time-lock governance

Eventual renouncement of ownership to the community DAO

This ensures Aureons remain free, fair, and future-proof — a **jungle** for everyone.

## 7. ROADMAP

# THE FUTURE OF THE JUNGLE

### Phase 1- Jungle Awakening

- . \$AUR token launch on Polygon.
- . Meme storytelling and community growth.
- . Listing on QuickSwap.
- . Early treasure teasers.

### Phase 2- Treasure hunt begins

- . On-chain adventure game.
- . NFT collectible launch.
- . Tribe staking system.
- . Partnership with meme and gaming project.

### Phase 3- Monkey Empire

- . Cross-chain interchain expansion.
- . DAO governance.
- . Merchandise and real-world collaborations.
- . Integration into future [Crypto Factor](#) ecosystem.

“Aureon grows in seasons—each phase unlocking deeper magic for those who walk with us.”

## 8. TEAM & ACKNOWLEDGMENTS

### THE TRIBE BEHIND THE TAIL

Founder / Lead Explorer:

A crypto adventurer since 2016, merging creative storytelling with a solid on-chain foundation to shape the spirit and structure of Aureon's world. His vision is simple: turn blockchain into a place of play, discovery, and real value — where every explorer can rise with the tribe.

Technical Partner:

Crypto Factor DAE — Providers of digital infrastructure, interchain tooling, and secure token mechanics. They are the unseen roots beneath Aureon's jungle, powering the pathways that keep the adventure alive.

Epilogue: **The Swing of Faith**

Aureon isn't just a monkey — he's a movement, a reminder that optimism and curiosity can build value faster than speculation ever could.

Through play, discovery, and collective laughter, Aureon transforms the blockchain into a living breathing jungle of opportunity.

**The earlier you swing, the higher you climb.**

THE END ♥
